DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 67 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no mention in the specification of a solid content of the latex being 30-50% by weight. There is no proof that latices Rhoplex I-98 and Rhoplex I-62, which have the solid content of 30% and 50% respectively, have been ever used in reducing the invention to practice. The solid content of the latices actually used in the Illustrative Examples, Rhoplex 2200 and Rhoplex A-920 is not shown in the specification. This is a new matter rejection.
